---

Good Afternoon Allan,

I am writing to show that I am against the Ottawa County Landfill in Coppersville allowing Republic Waste Services to inject fluid deep underground. I live in \*\*\*\*\* just a few miles from this Landfill. I have a well and I am very concerned this will effect our drinking water. I do not have access to city water. I do not want Coppersville, \*\*\*\*\* and other neighboring communities, that do not have access to city water to become another Flint situation, where they still do not have access to clean drinking water.

Please keep in mind that we have issues with PFAS in our rivers from dumping in our rivers because we didn't know it could harm our water. We don't need another community affected by bad water because of something we could have stopped.

I am asking that you vote no on this request.

Thank you

\*\*\*\*\*
